

---

*known as "TICKLE LIPO"!!! The brand new innovative N.I.L. (Nutational Infrasonic Liposuction) by Euromi with the optional highly effective fat transfer system!*

*The EVA sp®6 is composed by a control box (with an entirely digitalized display) regulating the compressed air supply to the Lipomatic® which allows the Nutational Infrasonic Liposculpture, a high-speed aspirator and a quantitative infiltration system.*

*The EVA sp®6 is a complete system. The quantitative infiltration system allows to control precisely the infiltrated quantity in different predefined zones. The system of pistons ensures an homogeneous infiltration at a constant pressure, whatever the type of fat, even fibrous.*
